

repeating. Instead of independent reaction from the public at large, OSHA filled the ergonomics public records with comments from its own paid witnesses. If you can believe it, the story gets worse.

When the public comment period was closed, OSHA allowed the ever-biased National Institute for Occupational Safety and Health, NIOSH, to submit over 3 years of scientific literature more than 6 weeks after the deadline. This, again, shows OSHA is hearing what it wants to hear, not what small businesses and the average American wants it to say. I strongly urge OSHA to stop this corrupt ergonomics rule-making and start over with a clean, fair, and objective rule-making process.

CONGRATULATING JACK ST. CLAIR KILBY

(Mr. SAM JOHNSON of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SAM JOHNSON of Texas. Mr. Speaker, it is Nobel Peace Prize time again, and I rise today to congratulate another Dallas resident, Jack St. Clair Kilby.

Mr. Kilby was awarded the Nobel Prize in physics. While you might not know him personally, his invention revolutionized the world. Shortly after joining Texas Instruments way back in 1958, Mr. Kilby conceived and built the first electronic circuit, microcircuit.

Without question, his development revolutionized the electronics industry, gave us such things as the cell phone and satellite communications. His invention allowed us to explore space, fly to the Moon, and develop sophisticated medical tools.

Mr. Speaker, I extend my heartfelt thanks and appreciation and congratulations to Mr. Kilby for his Nobel Prize award. He helped make America great.

ONE MORE TALL TALE FROM TENNESSEE

(Mr. SCARBOROUGH asked and was given permission to address the House for 1 minute.)

Mr. SCARBOROUGH. Mr. Speaker, a few minutes ago, we heard from the gentleman from Pennsylvania (Mr. PIRTS) telling us the tall tales of AL GORE, and the gentleman is right. There is a news article today about how AL GORE was a chicken farmer of over 10,000 chickens. This is a very versatile man.

He is also the inventor of the Internet, the man who brought us the dog pill story, the man who says he was the reason for "Love Story"; that was the first one to investigate Love Canal; that he was there when the Strategic Petroleum Reserve was invented, which he was not.

He has fought against big oil, and yet his family owes its fortune to Occidental Petroleum. He fought against Big Tobacco. In fact, in 1992, he said that on his sister's death that he swore he would fight the scourge of Big Tobacco for the rest of his life. Well, 2 years later he was telling tobacco farmers that he was one of them.

This is a man who at one time is a chicken farmer, the next he is a tobacco farmer, the next he is an enemy of Big Oil, the next he is a big protector of Big Oil. He is a very versatile man. I wish he would make up his mind and tell the American people exactly who he is.

ASKING ADMINISTRATION TO AGREE TO DEBT REDUCTION PROPOSAL

(Mr. HERGER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HERGER. Mr. Speaker, 29 days ago, this Congress sent President Clinton and Vice President AL GORE a proposal to lock away 100 percent of the Social Security and Medicare surpluses and dedicate at least 90 percent of the total budget surplus for debt reduction.

Mr. Speaker, 29 days and still no word from the Clinton-Gore administration. There will be an estimated \$268 billion surplus this fiscal year.

Our question is simple: Should it be used to pay off our national public debt and protect Social Security and Medicare, or should it be spent on more government spending? Republicans are for using the surplus to pay off the public national debt and protecting Social Security.

Mr. Speaker, I urge the President and the Vice President GORE to join us and put debt reduction and our seniors ahead of spending and agree to our 90-10 debt reduction proposal.

EULOGY TO THE HONORABLE OSCAR H. MAUZY

(Mr. FROST asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FROST. Mr. Speaker, yesterday was a sad day for Democrats across the country, not only did our former colleague, Bruce Vento, die; but one of the finest Democrats in the State of Texas, Oscar Mauzy, passed away yesterday. Oscar served in the State Senate for 2 decades representing a district in Dallas. He served on the Texas Supreme Court, and he stood for everything that was good and decent in politics.

He stood for civil rights at a time when it was not popular in Texas. He stood for the rights of the consumer, and he blazed a trail that made it possible for progressive Democrats to be elected in Dallas County. First Jim

Mattox, then I joined Jim in Congress, John Bryant after that, and EDDIE BERNICE JOHNSON following that. Oscar Mauzy will be truly missed by the people of the State of Texas.

TODAY'S MILITARY SMALLER, LESS CAPABLE, OVERWORKED AND LESS READY THAN 8 YEARS AGO

(Mr. HANSEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HANSEN. Mr. Speaker, last week Vice President GORE mislead every American again. I am not talking about raising chickens. AL GORE claimed that our military is the strongest in history. Our military is the best in the world today, but it is simply not true that our military today is the strongest in history, not even by recent history.

One only has to look back to the 1980s to find a military force 40 percent larger, with a much more robust capacity that could easily have engaged two major threats on two separate fronts at once. Today, the Joint Chiefs tell us that fighting two fronts could only be accomplished with high risk and significant loss of life.

Looking back at World War II, the United States fielded an Army of over 8 million soldiers and airmen. The United States was fighting on three separate fronts in three separate geographical areas of the world, and we were winning all three.

It is laughable to consider today's force equal. If AL GORE believes today's military is the best in history, he obviously has not talked to thousands of soldiers, airmen and Marines who are leaving in total frustration.

By any measure, today's military is smaller, less capable, overworked and less ready than it was 8 years ago. Anyone aspiring to be Commander in Chief should know that.

CONFERENCE REPORT ON H.R. 4205, FLOYD D. SPENCE NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 2001

Mrs. MYRICK. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 616 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 616

Resolved, That upon adoption of this resolution it shall be in order to consider the conference report to accompany the bill (H.R. 4205) to authorize appropriations for fiscal year 2001 for military activities of the Department of Defense and for military construction, to prescribe military personnel strengths for fiscal year 2001, and for other purposes. All points of order against the conference report and against its consideration
